

Preliminary data show outpatient mental health service use among children declined in all states through July, but the rate of decline varied across states

Notes: These data are preliminary. Data are sourced from the T-MSIS Analytic Files v4 in AREMAC, using final action claims. They are based on September T-MSIS submissions with services through the end of August. Recent dates of service have very little time for claims runout and we expect large changes in the results after each monthly update. Because data for August are incomplete, results are only presented through July 31, 2020. There is significant variation in how quickly states submit claims to CMS. It is possible that this variation in claims lag is responsible for the differences in utilization across states. Please refer to Slides 3 to 5 for additional information.
